

August 6, 2024

The Honorable Joe Biden
President of the United States
Office of the President
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

The Honorable Kamala Harris
Vice President of the United States
Office of the President
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear President Biden, Vice President Harris, and other lawmakers supportive of abortion care and gender affirming care:

As health care providers from across the country who are providing comprehensive sexual and reproductive health care including pregnancy care, miscarriage management, abortion care, and gender affirming care, we are firmly committed to building a future where everyone has access to the health care they need in their communities without delay, barrier, or stigma. Our commitment to this future implores us to urge the Administration and other lawmakers seeking to support abortion and gender affirming care access to be bold in their vision for the care of our communities. This includes, (1) moving beyond the legal framework created by *Roe v. Wade*; (2) actively and unequivocally supporting abortion throughout pregnancy, including later in pregnancy; and (3) supporting access to gender affirming care for young people and adults, alike.

While *Roe* provided a constitutional right to abortion, it never ensured access to that right for all those who needed it. The promise of *Roe*, the legal right to abortion care, was never fulfilled. This is especially true for communities facing the most barriers to care. When abortion care is treated as anything other than basic, essential health care and is so willingly stigmatized by supporters and non-supporters alike, ensuring true access to our communities is not possible. We urge the Administration and law makers across the country to broaden their efforts, moving beyond *Roe's* framework, and talk about the future our patients deserve boldly and bravely. We ask you to champion policy solutions that are not premised on returning us to the narrow protections *Roe* created. We deserve so much more. Our patients deserve so much more.

We also were deeply disheartened by the continued use of language stigmatizing those who need abortions and those who provide it. Just last month, the President stated that he did not

support access to abortion later in pregnancy. As providers of abortion care, this is deeply disheartening and counter to the commitments the Administration has made to patients, providers, and communities across the country to do everything in its power to ensure access to abortion care. Every person's reproductive health needs are unique. Every pregnancy is different. There are a multitude of reasons people need access to abortion care throughout their pregnancies and that decision should sit with the person seeking care, not the Administration.

Similar to embracing dangerous and stigmatizing language about access to abortion later in pregnancy, statements that stigmatize gender affirming care cause tremendous harm. The President's statement opposing gender affirming care for young people was unacceptable and out of touch with the needs of young trans and nonbinary people in this country. As health care providers, we know that transgender and nonbinary youth face multiple barriers to essential care. Comments such as this are dangerous in that they worsen life-threatening stigma, and firm up opposition to this essential care.

This is a watershed moment in our Nation's history. The attacks on democracy and reproductive rights require us to explore new ways to ensure people get the time sensitive, essential care they are currently unable to access in many parts of the country. We need bold action and brave, inclusive messaging now more than ever. Our communities deserve to see those with political power respond to our basic health care needs and embrace this bolder vision for the future; a future where no matter who you are or the health care you need, you can get that care in your community without barrier, shame, or stigma.

Signed,

Stephanie Mischell, MD Family Medicine in New Jersey
